

EDAG CARAVANING

DEVELOPMENT OF MOTOR HOMES

YOUR GLOBAL MOBILITY ENGINEERING EXPERTS

As a specialised division of the **EDAG Group**, the CARAVANING team develops motor homes and caravans.

In addition to the development of **components, modules and complete vehicles** with all scopes of the body, the interior and the installations, we also take care of the production of prototype parts, testing and production planning.

As motor home enthusiasts and with our high flexibility, development quality and **extensive experience in the caravanning industry**, we have become a respected **engineering partner** in this field.

We are happy to support you in the efficient implementation of your projects and the challenges and trends of the future – such as alternative drives and vehicle safety.
