

# EDAG MOTORRAD

BODY DEVELOPMENT

**YOUR GLOBAL MOBILITY  
ENGINEERING EXPERTS**

We present you today a dedicated department focusing on **body development** for the **Two- & Three-Wheeler** within **EDAG Motorrad** brand.

**The appearance** of a product plays a **major role** for the **buying decision**. Our main job in the body development is to combine the **styling expression** with the **functional characteristics**.

Our **development** teams, **design** studios, **validation** labs, **prototype** and **production** centers are well equipped to deliver our customers the whole range of body service form first sketches up to low volume series parts.

Our **turnkey development** capabilities are proved by several **international projects** containing **full responsibility** up to total vehicle.

We are happy to support you in efficient implementation of your two or three-wheeler projects. Discover our development know-how on our homepage.
